

PUBLIC NOTICE

TOWN OF HAMPTON

Mosquito Control

The Mosquito Control program begins the week of April 7, 2025 in the Town of Hampton. Crews from Dragon Mosquito Control, Inc. will be checking swamps, salt marshes, woodland pools, ditches, catch basins, storm drains and other shallow, stagnant water for mosquito larvae. When mosquito larvae are found, treatment may occur using one or more of the following insecticides:

VectoBac GS (*Bacillus thuringiensis israelensis* 2.8%)
VectoBac 12 AS (*Bacillus thuringiensis israelensis* 11.61%)
VectoPrime FG (*Bacillus thuringiensis* 6.07%, methoprene 0.10%)
Natular (spinosad 2.5%)
Altosid (methoprene 5%)
BVA 2 Mosquito Larvicide Oil (mineral oil 97.0%)
SunSpray MLO (mineral oil 98.8%)

Beginning in June, a truck mounted sprayer will disperse Duet (prallethrin 1% & sumithrin 5%) along roadways after sunset. Road spraying may continue into September. It is not possible to predict the dates of treatment this far in advance. The frequency of nighttime spraying along roadways is based upon mosquito surveillance data, weather conditions and other variables.

Residents who do not want their property sprayed may use our No-Spray Registry online at www.DragonMosquito.com/No-Spray-Registry or write to Dragon Mosquito Control, P.O. Box 46, Stratham, NH 03885. Be sure to include your name, physical address, phone number, house color and acreage. Call 603-734-4144 or email www.DragonMosquito.com for more information on spray dates, location, materials used, precautions or other concerns.
